Swiss Masterclasses in Respiratory and Eosinophilic Sciences

Dear colleagues,

We are pleased to invite you to the Swiss Masterclasses in Respiratory and Eosinophilic Sciences that have been initiated by two groups of experts representing A level hospitals in Switzerland.

This accredited advanced medical education program will offer you a comprehensive curriculum of six advanced one-day training courses in the two specified scientific fields and provide an up-to-date overview of the current diagnosis and management of respiratory and other eosinophil-associated conditions. Each of the two series consists of three independently set up events with complimentary topics.

The goal is to create balanced educational events for rising experts in Switzerland interested in developing their skillsets for treating patients suffering from respiratory and/or eosinophilic diseases. The spirit of the training course is a stimulating interdisciplinary working and learning environment that combines plenary lectures with interactive practical, hands-on sessions and various opportunities for direct interaction between speakers and participants.

We would be delighted to welcome you to the Swiss Masterclasses in Respiratory and Eosinophilic Sciences.

The first Masterclass in Eosinophilic Science will take place on November 13, 2021 at the Inselspital in Bern and will be hosted by the two Chairs Prof. Hans-Uwe Simon and Prof. Christophe von Garnier.

The other five courses are scheduled throughout 2022.

Register now for the first Masterclass and sign up for our newsletter to receive news on all upcoming events:

www.swiss-masterclasses.ch

We will request credits for each Masterclass from several medical societies depending on the specific event topics. Please refer to our website for more details.

Saturday, November 13

Masterclass Eosinophilic Science - Course A

Eosinophilic diseases (skin, lung, esophagus and bone marrow/blood): diagnosis and therapy

Date & Time November 13, 2021 | 10:00 – 16:00

Location Institute of Pharmacology, University of Bern, INO Building Inselspital, Bern

Registration fee CHF 50

Program

Chairpersons

Prof. Dr. Dr. med. Hans-Uwe Simon

Prof. Dr. med. Christophe von Garnier

From 9:30	Welcome coffee
10:00 - 10:30	Lectures New aspects of the function of eosinophils Hans-Uwe Simon, Bern
10:30 – 11:00	Diagnosis and therapy of hypereosinophilic syndromes Alicia Rovo, Bern
11:00 – 11:30	Diagnosis and therapy of eosinophilic skin diseases Dagmar Simon, Bern
11:30 – 12:00	Eosinophils as biomarkers in severe asthma Christophe von Garnier, Lausanne
12:00 – 13:00	Standing buffet
13:00 – 14:30	Workshops Algorithm for evaluating eosinophilic diseases Dagmar Simon, Bern
14:30 – 15:00	The eosinophil as a target structure for biologics Susanne Radonjic, Bern
15:00 – 15:30	New methods for stratifying patients with eosinophilic esophagitis Thomas Greuter, Lausanne
15:30 – 16:00	Eosinophil subpopulations Hans-Uwe Simon, Bern
16:00 – 16:05	Closing remarks Hans-Uwe Simon, Bern
16:05 – 16:30	Farewell coffee
